

# Adobe® Acrobat® 8 Professional

FOR MACINTOSH (UNIVERSAL BINARY) AND WINDOWS\*

## Communicate and collaborate with the essential PDF solution

### What's New

Adobe Acrobat 8 Professional software delivers advanced tools for creating, collaborating with, and controlling the output of high-quality Adobe PDF files. It is an essential upgrade for creative and print professionals who want to improve collaboration, streamline review and signoff, automate output to different mediums, and deliver press-ready files. Now you can work with Adobe PDF files more easily using a task-oriented new interface. Create content-rich PDF files and assemble related PDF files into a PDF package that preserves individual files. Collaborate more closely with reviewers through new server-based shared reviews, or click Start Meeting to quickly collaborate online and in real time with your clients and colleagues. Preflight and automatically fix issues in PDF files before outputting them as press- or web-ready files. And automate print production workflows with enhanced JDF support. With built-in support for industry standards such as PDF/X and JDF, Acrobat 8 Professional is a mission-critical component in design and print workflows today.

### Top ten features in Adobe Acrobat 8 Professional

- **New user interface and getting started screen** Acrobat 8 Professional introduces a more streamlined, task-based user interface and offers easy ways to customize your tools.
- **Acrobat Connect®** Acrobat 8 introduces one-button access to the real-time, Web-based collaboration services provided by the latest member of the Acrobat family, Acrobat Connect (formerly Breeze).
- **Preflight with automated corrections** Traditionally, preflight utilities assist in finding problems, but Acrobat 8 Professional includes advanced preflighting tools that find problems and automatically fix them too.
- **JDF workflow automations** Utilize the Job Definition Format to automate PDF creation, preflight, and correction and packaging/delivery of final files.
- **Shared review** Set up, organize, and manage real-time document reviews more efficiently than ever using a shared network drive, allowing reviewers to see other's comments immediately as they are posted.
- **PDF Package** Have multiple files to send out or archive? Rather than deal with individual files, Acrobat 8 Professional can combine multiple files into a single PDF package.
- **Enhanced free Adobe Reader® support** Acrobat 8 Professional enables support in PDF files for the filling out of PDF forms and digitally signing PDF files using the free Adobe Reader application.
- **Support for industry standards** Acrobat 8 Professional supports industry standards, such as PDF/X-1a, PDF/X-3, JDF, XMP metadata, and XML, and new support for PDF/X-4(draft) and PDF/A.
- **Enhanced integration with Adobe Creative Suite® 2 Premium software** Acrobat 8 Professional adds the ability to synchronize color management settings with other Creative Suite components, shared print technology and transparency flattener presets, and integration with Version Cue® CS2 software.
- **Printing enhancements** Acrobat 8 Professional contains enhancements and new tools for inserting watermarks and backgrounds, cropping and precisely positioning content, and printing booklets.
