

Adobe® Acrobat® 9

Communicate and collaborate more easily and securely with Adobe PDF

At A Glance

Adobe Acrobat 9 software enables business, creative, and technical professionals to communicate and collaborate with confidence using Adobe Portable Document Format (PDF), the de facto standard for electronic document exchange. Use Acrobat 9 to organize content from a variety of sources into a professional PDF Portfolio, bring people and ideas together with easy-to-manage electronic reviews, and simplify the creation and completion of forms to efficiently collect, analyze, and use data. With Acrobat 9, you can protect and control sensitive information, safeguard your work, and communicate exactly as intended. The Acrobat 9 family includes Acrobat 9 Pro Extended, Acrobat 9 Pro, and Acrobat 9 Standard, all offering an array of new and enhanced features.

Share information and communicate with impact and clarity

Unify a wide range of content into a PDF Portfolio—Assemble documents, drawings, e-mails, spreadsheets, and rich media—including video, audio, 3D, and maps—into a single, compressed PDF Portfolio. Choose one of many new, professional templates to quickly integrate content, define navigation, and add polish to your PDF Portfolio. Easily brand and customize your template with details like logos, color schemes, photos, and contact information. Seamlessly share PDF Portfolios across platforms.

Top New & Enhanced Features of the Acrobat 9 Family

- Unify the widest range of content into a PDF Portfolio
- Native support for Adobe Flash
- Ability to synchronize document views with others
- Enhanced shared document review process
- Enhanced creation and management of PDF forms
- Adobe Presenter software included for interactive, on-demand presentations
- Enhanced conversion of web pages to PDF
- View and interact with PDF maps
- Expanded 3D features
- New ways to control the quality of your PDF output
- Works with Acrobat.com
- Enhanced launch performance

Easily share video in PDF—Incorporate video into your communications. New, native support for Adobe Flash® in Acrobat 9 enables reliable, cross-platform sharing of video, animations, and applications in Acrobat and Adobe Reader® software. Quickly and easily convert a variety of video formats to Flash for seamless playback without the need for a special media player. Incorporate Flash Widgets—mini-applications that use web services to deliver content such as real-time stock quotes, maps, or games—that viewers using Adobe Reader 9 software or Acrobat 9 can play directly from within a PDF document.

Create interactive, on-demand presentations—Use newly included Adobe Presenter software to liven up slides with video, voice-over, demos, and interactive quizzes, then output to PDF for reliable, cross-platform sharing with anyone using the free Adobe Reader.

Convert web pages to PDF—Enhanced web capture allows you to convert complete web pages, or just the portions you want, including or excluding rich and interactive media. PDF versions of web pages are easy to print, archive, mark up, and share.

Convert paper documents to PDF—Enhanced Optical Character Recognition (OCR) technology and support for a broader range of scanners improves the appearance of and ability to search within scanned documents.

View and interact with PDF maps—New capabilities enable you to search, measure, and mark up geospatially enabled PDF maps. Discover the longitude and latitude by placing your cursor over a location. Measure PDF maps in kilometers or miles.

Expanded 3D features—Use the new Adobe 3D Reviewer to combine multiple CAD formats into one assembly, compare a revised design to an earlier version, measure and section on precise geometry, and create exploded views, animations, and balloons. Export your work to 2D vector or raster files, or save as PDF.

Bring people and ideas together with easy-to-manage electronic reviews

Conduct shared reviews—Initiate and manage a shared document review, where the comments of all reviewers are stored in one location. Participants can view and respond to the input of other team members as comments are being made. Users can now manage a shared document review using Acrobat.com, which provides access to all reviewers, regardless of whether they are inside or outside the firewall.

Synchronize document views—Ensure that colleagues, clients, and partners are on the same page at the same time with the new ability to co-navigate documents. To provide clarity and enhance discussion, Acrobat 9 works with Acrobat.com, enabling users to walk others through a PDF document in real-time by controlling the exact page and page location they see.

Include Adobe Reader users—Enable anyone using the free Adobe Reader to digitally sign documents, and participate in shared document reviews. By extending Acrobat functionality to Adobe Reader users, anyone you choose can participate in the workflows you initiate.

Works with Acrobat.com—Now use new Acrobat.com hosted services with Acrobat 9 to store and work together on large documents.

Compare PDF documents—Enhanced capabilities automatically highlight the differences between two versions of a PDF document, including text and images, so you can quickly and easily identify what has changed.

Simplify the creation, management, and completion of forms

Easily create and track electronic forms—Use the new Forms Wizard to create forms from paper or electronic documents. Quickly add, edit, and name form fields. Use the Tracker to see when forms have been completed and who has completed them. Now use Acrobat.com to provide an easy-to-access place to distribute and store forms, as well as collect and analyze forms data.

Enable virtually anyone to fill and save forms—Enable anyone using the free Adobe Reader to fill and save PDF forms locally.

Safeguard sensitive information

Protect your documents—Leverage new, 256-bit encryption to protect sensitive information. Use passwords to control access to PDF documents. Apply permissions to restrict printing, copying, or altering PDF documents.

Permanently remove sensitive information—Use redaction tools to remove sensitive text, illustrations, or other information, permanently deleting the content from the PDF document. Inspect PDF documents for metadata, hidden layers, and other concealed information, and remove it before distributing to others.

Control the quality of your PDF output

Improve print processes—Control costs and reduce errors with automated output controls to preview, preflight, correct, and prepare PDF files for high-end print production and digital publishing.

Verify PDF standards—New PDF Standards Pane provides details on compliance to PDF/A, the ISO standard for long-term archiving of electronic documents, PDF/X, the ideal format for high-quality, professional printing, and PDF/E, the standard format for the reliable exchange of engineering documentation and drawings.

Create and validate accessible PDF documents—Ensure your PDF documents are optimized for people with visual disabilities. Create accessible PDF documents from almost any source to comply with standards. Quickly evaluate, correct, and automatically tag PDF documents for optimized accessibility and reflow.
